- Easy to learn and use for your wait staff
- Improves speed and service for your guests
- More accurate orders reduce food waste
- Ultra-reliable Apple Mac® hardware and OS
- Fully customized for your restaurant
- Surprisingly affordable
- Management reports

It all works together for better service resulting
in maximum profit!

Here's how...

- Better cash control to prevent financial loss

Make sure what goes out of the kitchen goes into the cash drawer. All orders entered by servers print to the kitchen. Shift reports accurately total those orders.

- Easy to learn and use for your wait staff

Simple easy to use order entry system is based on **your** menu. Servers simply pick the category and then the item from a list, exactly like your menu. No confusing grid patterns or icons to learn.

New people can be trained in almost no time, and faster order entry means more productivity and less staff required to serve your guests.

- Improves speed and service for your guests

Faster service means happier guests and more repeat business. It also means more table turns for increased revenue on busy nights.

- **More accurate orders reduce food waste**

With the high cost of food these days, mistakes can be costly. Mistakes also reduce kitchen capacity. Worst of all they result in delayed service and unhappy guests.

- **Ultra-reliable Apple Mac® hardware and OS**

Reliability is key to profitability. The last thing you need is your POS system going down on a busy night with a packed house and a line out the door.

The legendary stability and virus resistance of the Mac® Operating System provides a solid foundation for a system you can count on.

- **Fully customized for your restaurant**

Your restaurant is unique. It's an expression of you and your art. So why give that up to fit a "standard" POS system?

In the future, your restaurant will probably change, evolve, and grow. You need a system that is flexible and scalable to change and grow with you.

- **Surprisingly affordable**

Easy-Serve POS is easy on your wallet too! The purchase cost is very competitive with other systems on the market. Even better there is no need for support or service contracts, because it just works! Leasing and financing plans are available too.

- **Management reports**

Extensive management reports give you deeper insight into your business, and help you find opportunities to improve profits. They will also help you manage the day to day operations, and plan for the future.

- Support

All systems include one year of technical support for free. For technical support, you get my personal cell phone number. Call me any time of day or night. I can do this because I know problems will be rare. My philosophy is: "If you have a problem, I have a problem," and I will do everything in my power to fix your problem as quick as possible.

- 90 day Unconditional Guarantee

If you are unhappy with the system for any reason, I will refund 100% of the purchase price of the POS software. Computer hardware and commercial software is warranted by the respective manufacturers.

Call or email me for your FREE,
no obligation, no pressure,
demonstration and consultation.
